

VECTAN®

POWDERS

BY NOBEL SPORT

RELOADING DATA

► VECTAN RANGE OF SHOOTING POWDERS

VECTAN powders cover all the applications of pistol and rifle reloading and are proposed in four different ranges :

METALLIC POWDERS

VECTAN Ba10, Ba9 1/2, Ba9, Ba7 1/2, Ba6 1/2

Powders single base in stick. This range is now completed with Ba9 1/2, Ba7 1/2 and Ba6 1/2.

This range is particularly adapted for handgun reloading. All the powders of this range are absolutely clean burning and now have the same dimensions.

Ba9 1/2 : this new powder between our traditional Ba10 and Ba9 covers a wide range of calibers and is perfectly adapted to the 9 x 19mm, .38 Super Auto, .38 Special, .357 Mag., .40S&W, .44S&W Special, .44 Remington Magnum, .45ACP, .45 Colt

Ba7 1/2 : created to extend reloading possibilities. It gives excellent results for 9mm Luger, 10mm Auto, and .45ACP

Ba6 1/2 : it is the slowest powder of this range. It was specially designed for Magnum handguns ; it is also perfectly adapted to reload small rifle calibers such as .22 HORNET and .30 calibers.

VECTAN Tubal 3000, 5000, 7000, 8000

Tubular, single base powders, listed here above by decreasing burning rate order from the fastest to the slowest. Vectan Tubal powders are designed for rifles.

TARGET POWDERS

VECTAN A24, AS, A1, AO

Single base flake powders with color identification, intended for handgun use and some rifle applications.

VECTAN 206 SV, 206 V, D20

Single base disc green powders, intended for shotshell applications.

VECTAN Prima SV, Prima V, GM3

Single base granulated powders, intended for shotshell applications.

FOR REFERENCE ONLY - PLEASE DO NOT USE IT FOR LOADS CALCULATION

LOADING DATA AND RELOADING SAFETY FOR VECTAN SMOKELESS POWDERS

Before you start reloading, read the safety rules carefully and keep all of them in mind. You must always be on the safe side when loading and be ensured of the good quality of your work.

Wear proper eye protection • Pour out only the powder quantity needed for immediate reloading work • Keep the plastic bottle tightly closed • Keep your reloading bench in good order • Clean up spilled powder with a broom and dustpan • Do not use a vacuum cleaner • In order to avoid double powder charge, please visually check the powder level in the cases • Do not keep old or salvaged powders • Never start with the maximum powder load indicated • Start reloading with the minimum cartridge length shown in the table • When preparing test loads, make sure you work from cases you have numbered legibly with a permanent marker • Once at a shooting range, fire the cartridges in the same order as loaded, starting from the lightest powder charge, using a solid rest • You will probably identify several points where velocity is approximately identical and impacts group closer to one another • By all means use a reliable electronic chronograph and record all velocities • Velocities and pressures are closely related • Always use the same point of aims from the same shooting rest • Mark on a separate target the exact point of impact and number them • Depending of the intended use of your handloads, select the proper load – velocity- accuracy • Record the safest and best loading information in your records for future reference • Dispose of all loading and shooting waste in accordance with Local, State and Federal laws and regulations

If you change one single component (primer, case brand or types, bullet brand, type or weight), you must start all over again and work up exactly as you would do when loading a new caliber for a new gun.

Closely inspect all cases immediately after firing, measure cases if you feel pressure could be high. Always keep a watchful eye on pressure signs (difficult extraction, flattened or blown primers and unusual recoil). In rifle cartridges, you will be able to start looking for an accurate load by adjusting bullet seating depth etc. only once you have identified the proper charge of the proper powder.

IMPORTANT : The loading data supplied herein are offered only as information and cannot be considered as a recommendation. This data has been considered safe in the firearm(s) in which they were developed. This does not mean they will be safe in your own firearm, whatever its age, brand or origin. For the same reason, any variation in firearm(s) or components might bring very different and possibly unsafe results. As Nobel Sport has no control over the data user's gun, components, dies and methods Nobel Sport and distributors of its products does not warrant any use the ultimate user may make of Nobel Sport powder or this loading data and cannot accept any responsibility whatsoever in whatever incidents or accidents (material, psychological or physical, direct or indirect) to which the user of these data or any other person might be exposed. The simple fact of using, either directly or indirectly, the data supplied implies complete, full and informed acceptance of the above conditions and ipso facto discharges both Nobel Sport as well as distributors of any and all responsibility.

Reproduction of these data in print or by any other means including computer or internet files is subject to prior approval in writing.

The loading data tables have been prepared in the Nobel Sport laboratories according to CIP Rules. Loads shown have been reached with the components used in their development and were fired in proof barrels under carefully controlled conditions. The end user might reach very different results due to handloading methods, procedures, components and tools, the actual firearm used and climatic variations.

NOTICE : Nobel Sport can exercise no control whatsoever on the above, Nobel Sport disclaims any responsibility for any incident or accident resulting from the use/misuse of their smokeless powders and recommended loading data. Nobel Sport disclaims all warranties, whether express or implied (including warranties of merchantability and fitness for particular purpose). Buyers and users assume all risk, responsibility and liability or whatever for any all injuries, death, losses damages to persons or property that may result from the use/misuse of this product.

COMPONENTS : Nobel Sport only produces single base smokeless powders used in these tables. Components listed in these tables were acquired on the open market and are produced outside of Nobel Sport' control. Any change in components will result in changes in the ballistic performance of handloaded ammunition. All information supplied in only indicative and possibly will not reflect actual performance in the field.

CHARGE WEIGHTS : They are listed in grains, the loads listed gave good results both pressure-wise and velocity-wise under laboratory conditions with the components listed. Actual field results using other components may and will generally be different.

HANDLOADING PROCEDURES : It is essential that the reloader starts with the minimum load and gradually increases until reaching the ideal load. Beginners are urged to stay with minimum loads until they have gathered enough experience, both in shooting techniques and handloading techniques.

SHOTSHELL RELOADING DATA : Loading data in this loading table has been developed for lead shot only. Do not use this data with steel or other non-toxic shot pellets

MAXIMUM C.I.P. PRESSURES : C.I.P. is an international, independent normative body. C.I.P. has established maximum mean allowable pressures for nearly every cartridge currently chambered in commercial firearms. We advise powder purchasers to endeavor to have their handloads tested by one of the C.I.P. laboratories.

LEAD WARNING : Discharging firearms in poorly ventilated areas, cleaning firearms, or handling ammunition may result in exposure to lead and other substances known to cause birth defects, reproductive harm, and other serious physical injury. Have adequate ventilation at all time. Wash hands thoroughly after exposure.

SAFETY AND HEALTH PRECAUTIONS

- Store in a cool, dry place, keep in ventilated area at all times
- Never substitute these smokeless powders for black powder or muzzleloading powder
- Minimize inhalation, avoid contact with skin or clothing
- Do not take internally ; Do not ingest powder
- Keep powder out of reach of children
- Keep away from electrical devices that could produce sparks during storage and handling
- Keep away from combustible or flammable liquids
- The powder must be stored in its original packing
- Do not mix different type and /or burning rate of powders
- Do not smoke where powder is stored and where you are loading it
- Follow all regulations in accordance with Local, State and Federal laws regarding purchase and storage in your country
- Be certain that the powder container is empty prior to discarding

You should consult the pamphlet "Smokeless Powder (Properties & Storage)" from the Sporting Arms and Ammunition Manufacturer's Institute, Inc. 11 Mle Hill Road, Newtown, Connecticut 06470-2539, (203) 426-4358, www.saami.org

SHOTSHELL RELOADING

WARNING: BALLISTIC PRODUCTS, INC., GRAF & SONS, INC., AND NOBELSPORT DISCLAIM ALL POSSIBLE LIABILITY FOR DAMAGES, INCLUDING ACTUAL, INCIDENTAL, AND CONSEQUENTIAL, RESULTING FROM USAGE OF INFORMATION OR ADVICE CONTAINED IN THIS AND OTHER PUBLICATIONS, LABELS, CATALOGS, TESTING REPORTS AND BOOKLETS. USE DATA AND ADVICE AT YOUR OWN RISK AND WITH CAUTION. WHERE DATA LIST SPECIFIC COMPONENTS, NO CHANGES OR SUBSTITUTIONS FOR THESE COMPONENTS CAN BE MADE WITHOUT RISKING SIGNIFICANT CHANGES IN THE LEVEL OF BALLISTIC PERFORMANCE AND/OR SAFETY OF THE LOADS SHOWN. FOLLOW LOADING DATA EXACTLY AND DO NOT SUBSTITUTE COMPONENTS. WE MAKE NO WARRANTIES EXPRESS OR IMPLIED, LIMITED OR FULL, AND WE DISCLAIM ANY SUCH WARRANTIES. FAILURE TO COMPLY WITH THESE AND OTHER STANDARDS OF RELOADING MAY RESULT IN ACCIDENTS WITH SERIOUS INJURY AND/OR DEATH TO THE SHOOTER AND/OR BYSTANDERS. KEEP OUT OF REACH OF CHILDREN. WE DISCLAIM ANY AND ALL LIABILITY FOR DAMAGE OR INJURY THAT MAY RESULT FROM YOUR HANDLOADED SHOTSHIELDS AS WE HAVE NO CONTROL OVER ANY OF THE NUMEROUS POSSIBLE VARIATIONS IN COMPONENT PRODUCTION LOTS, IN TOOL AND DIE DIMENSIONS, IN YOUR LOADING PRACTICES AND PROCEDURES. THE INDIVIDUAL RELOADER IS SOLELY RESPONSIBLE FOR ANY VARIATION THAT MAY BE INCURRED BY ASSEMBLED AMMUNITION. TO AVOID SERIOUS INJURY OR DEATH TO SHOOTER AND BYSTANDERS, THIS PRODUCT SHOULD ONLY BE USED IN GUNSMITH-INSPECTED GUNS DESIGNED FOR MODERN SHOTSHIELDS. IF GUN FAILS TO FIRE, KEEP POINTED IN SAFE DIRECTION FOR 30 SECONDS, THEN UNLOAD CAREFULLY. WEAR EYE AND EAR PROTECTION AND OBSERVE PROPER GUN SAFETY AT ALL TIMES. ALL PRODUCTS SOLD "AS IS".

WARNING: BALLISTIC PRODUCTS, INC., GRAF & SONS, INC., AND NOBELSPORT DISCLAIM ALL POSSIBLE LIABILITY FOR DAMAGES, INCLUDING ACTUAL, INCIDENTAL, AND CONSEQUENTIAL, RESULTING FROM USAGE OF INFORMATION OR ADVICE CONTAINED IN THIS AND OTHER PUBLICATIONS, LABELS, CATALOGS, TESTING REPORTS AND BOOKLETS. USE DATA AND ADVICE AT YOUR OWN RISK AND WITH CAUTION. WHERE DATA LIST SPECIFIC COMPONENTS, NO CHANGES OR SUBSTITUTIONS FOR THESE COMPONENTS CAN BE MADE WITHOUT RISKING SIGNIFICANT CHANGES IN THE LEVEL OF BALLISTIC PERFORMANCE AND/OR SAFETY OF THE LOADS SHOWN. FOLLOW LOADING DATA EXACTLY AND DO NOT SUBSTITUTE COMPONENTS. WE MAKE NO WARRANTIES EXPRESS OR IMPLIED, LIMITED OR FULL, AND WE DISCLAIM ANY SUCH WARRANTIES. FAILURE TO COMPLY WITH THESE AND OTHER STANDARDS OF RELOADING MAY RESULT IN ACCIDENTS WITH SERIOUS INJURY AND/OR DEATH TO THE SHOOTER AND/OR BYSTANDERS. KEEP OUT OF REACH OF CHILDREN. WE DISCLAIM ANY AND ALL LIABILITY FOR DAMAGE OR INJURY THAT MAY RESULT FROM YOUR HANDLOADED SHOTSHIELDS AS WE HAVE NO CONTROL OVER ANY OF THE NUMEROUS POSSIBLE VARIATIONS IN COMPONENT PRODUCTION LOTS, IN TOOL AND DIE DIMENSIONS, IN YOUR LOADING PRACTICES AND PROCEDURES. THE INDIVIDUAL RELOADER IS SOLELY RESPONSIBLE FOR ANY VARIATION THAT MAY BE INCURRED BY ASSEMBLED AMMUNITION. TO AVOID SERIOUS INJURY OR DEATH TO SHOOTER AND BYSTANDERS, THIS PRODUCT SHOULD ONLY BE USED IN GUNSMITH-INSPECTED GUNS DESIGNED FOR MODERN SHOTSHIELDS. IF GUN FAILS TO FIRE, KEEP POINTED IN SAFE DIRECTION FOR 30 SECONDS, THEN UNLOAD CAREFULLY. WEAR EYE AND EAR PROTECTION AND OBSERVE PROPER GUN SAFETY AT ALL TIMES. ALL PRODUCTS SOLD "AS IS".

WARNING: POWDER BUSHINGS YIELD VOLUMETRIC MEASUREMENTS ONLY AND MAY NOT CORRESPOND TO THE DESIRED POWDER WEIGHT. ALL BUSHING CHARTS ARE CREATED WITH ONE PRODUCTION LOT OF POWDER AT ONE POINT IN TIME. THEREFORE, IT IS NECESSARY THAT ALL SHOT AND POWDER CHARGES BE WEIGHED AND VERIFIED USING A PROPERLY FUNCTIONING LOADING SCALE. EACH INDIVIDUAL BUSHING AND LOADING PRESS WILL SHOW SLIGHT VARIATIONS IN POWDER DROPS. CONDITIONS SUCH AS HUMIDITY, VIBRATION AND STATIC WILL HAVE AN EFFECT ON THE ACCURACY TO POWDER DROPS AND CAN CAUSE VARIATION. CHARGES MAY VARY SLIGHTLY DUE TO OPERATORS TECHNIQUE AND/OR OTHER VARIABLES.

Troubleshooting Irregular Powder Drops:

When starting each loading session, inserting a new bushing, or refilling the powder cylinder. Always cycle the first 3-5 powder droppings. These first charges will be inaccurate as the propellant requires time to settle in the press.

- Verify that your press is properly aligned. Ensure that the press is assembled correctly and allows the bushing to line up directly over the drop tube.
- Check your press for missing or damaged O-rings.
- Regularly clean your press as propellants will inherently accumulate in the moving parts of the tooling head and underneath bushings.
- Utilize powder baffles to remove additional weight and backed-up propellant from the bushing/charge bar.
- Verify that you have the correct bushing # installed in the press.
- Propellant containers are subject to large amounts of vibration during shipping. It is common that the flakes/granules will separate themselves by size within the container. With the smaller particles having fallen to the bottom of the container, the hand-loader will see large amounts of variations throughout the loading session. To rectify this issue, it may be necessary to remix the powder before loading it into the press. Ensure the propellant bottle is tightly sealed, lay it on its side on a flat, non-static surface, and gently roll the bottle back and forth.
- The individual hand-loader's reloading practices are often at fault for many powder drop variance issues. The faster the press is cycled (rapidly moving the charging levers back and forth), the greater the opportunity for drop variance. Speed loading is not conducive to building quality, high-performance loads. Slow down and allow time for the propellant to completely fill the bushing.
- Propellants will vary from lot to lot. It is not uncommon to see slight fluctuations each time you purchase a new container of powder.

Verifying Powder Drops

- Utilize a powder pan to safely obtain a powder charge from the press.
- Carefully weigh the charge on an appropriate bench scale.
- Record the drop charge in Grains and repeat 10 times.
- Average the 10 drop weights to determine the powder charge.
